

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and once available a copy may be obtained without charge, by calling the Fund at 323-925-3305 Read it carefully before investing.

Investing involves risk. Principal loss is possible. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV, and are not individually redeemed from the funds. Brokerage commissions will reduce returns.

The Fund is also subject to the following risks: Collateralized Loan Obligations (CLOs) are generally backed by a pool of credit-related assets that serve as collateral. Accordingly, CLO securities present risks similar to those of other types of credit investments, including default (credit), interest rate and prepayment risks. In addition, CLOs are often governed by a complex series of legal documents and contracts, which increases the risk of dispute over the interpretation and enforceability of such documents relative to other types of investments. An increase in interest rates may cause the value of fixed-income securities held by the Fund to decline. The Fund may be subject to a greater risk of rising interest rates due to the current period of historically low rates and the effect of potential government fiscal policy initiatives and resulting market reaction to those initiatives. The Fund's income may decline if interest rates fall.

The Fund is a recently organized, diversified management investment company with no operating history. Additionally, the investment adviser has not previously managed a registered fund, which may increase the risks of investing in the Fund.

Credit ratings are provided by a nationally recognized statistical rating organization (NRSRO). Ratings are grades given to bonds that indicate their credit quality as determined by private independent rating services such as Standard & Poor's, Moody's and Fitch. These firms evaluate a bond issuer's financial strength, or its ability to pay a bond's principal and interest in a timely fashion. Ratings are expressed as letters ranging from 'AAA', which is the highest grade, to 'D', which is the lowest grade.

Diversification does not assure a profit nor protect against a loss in a declining market.

Basis points (BPS) refers to a common unit of measure for interest rates and other percentages in finance. One basis point is equal to 1/100th of 1%, or 0.01%, or 0.0001, and is used to denote the percentage change in a financial instrument.
